Project Title: Del Puerto Creek Sediment Removal Project

Project Applicant: California Department of Water Resources

Project Location (include county): Del Puerto Creek, Stanislaus County, 4 miles northwest of Patterson, CA

Project Description:

The proposed project includes actions to restore channel flow capacity within Del Puerto Creek, and to forestall potential damages to the California Aqueduct levee. These actions include the removal of silt/cobble within 200 feet upstream of where Del Puerto Creek crosses under the Aqueduct, returning the drainage to its intended condition; placement of rip-rap along both sides of the creek embankments to stabilize the banks and prevent erosion of the Aqueduct levee; repairing a rocked drainage ditch that channels water runoff from the Aqueduct levee directly to the creek bed, improving the flow of water away from the levee toe; and access road improvements.

This is to advise that the California Department of Water Resources has approved the above (X) Lead Agency or [] Responsible Agency)

described project on 4-21-15 and has made the following determinations regarding the above (date) described project.

- 1. The project [] will [X] will not] have a significant effect on the environment.
2. [] An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA. [X] A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures [X] were [] were not] made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan [X] was [] was not] adopted for this project.
5. A statement of Overriding Considerations [] was [X] was not] adopted for this project.
6. Findings [X] were [] were not] made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the negative Declaration, is available to the General Public at:
